2.5) Expected Grade in this Course

3. OPEN ENDED QUESTIONS
(INSTRUCTOR)

3.1) Please comment on specific characteristics of the course that were most beneficial to you:

- Extra credit
- Having class recordings available for students that missed a certain day, as well as extra credit opportunities.
- I enjoyed our ability to rewatch previous lectures when uncertain about material. Being in 5 classes and working, this ability allowed me to refresh knowledge before important due dates.
- I liked all the examples given in lectures because they helped with problem sets and exams.
- I think the overall teaching style really helps with learning the material. Also, providing a lot of great feedback on the problem sets, make learning the material easy.
- Instructor wanted us to learn, she seemed like she enjoyed doing her job.
- N/A
- Phenomenal
- The amount of effort the professor put into the class was very noticeable, I enjoyed the classwork because of the clear-cut explanations that were given, and were able to understand everything she put forward because of her amazing lectures.
- The course material for this class is hard. It's just a difficult topic. But the professor was fantastic. She was always willing to explain things again or in a different way. She held extra sessions for reviews and made it clear to students she was there for them. I really appreciated her teaching style and her willingness to meet her students halfway on a very hard subject.
- The instructor did a really good job giving examples of the material.
- The lecture recording was very beneficial.
- The professor did a great job with including examples and step by step solutions. This made it a lot easier to understand the material. She always check in after every step to make sure we understood what she was saying.
- The professor is very knowledgeable. She always knew the answers to problems within the subject. She is very approachable and on top of things. Unlike many professors, she emails updates all the time which help me know what is due and what to study. The course was organized extremely well.
- The professor was always willing to help, showed strong enthusiasm about her job and teaching, and the professor made sure all of us understood the material. The lectures modeled the assignments, the grading was quick, expectations were clear, and technology was used appropriately. Great course.
- The slides for the class were very well done. I would still look at the book but the slides were enough for me to understand what was going on in class on a daily basis. The instructions for Stata were also very well done and I didn't have much trouble figuring out what to do for the homework. Overall the class was super helpful and straightforward. I definitely feel like I understand STATA much more than before I took this class.
- The teacher and the TA were very helpful and answered any question I had. And they both cared about making sure you understood the material.
- Videos are informative
- Well written powerpoints
- n/a

3.2) Please comment on specific aspects of the course that need improvement:

- I can't think of anything that needs improvement, except maybe more content on Stata during synchronous lectures.
- I can't think of anything that would really need to be changed overall.
- I would do an iclicker reef or attendance for your class. I noticed toward the end there would be fewer students in class.
- Maybe explain the problem sets at a more slower pace
- More example problems in the lectures
- N/A (3 Counts)
- N/a teacher did her best to help students excel in course
- None
- None, it was a great class overall.
- Nothing
- Nothing in particular
- Nothing it was perfect
- Sometimes the lectures can lose some engagement due to not having anything to take notes on since the slides are available until after the lecture. In an online environment, it's very easy to get distracted so the students writing stuff down or some other type of way to keep us a bit more focused would help. It sounds silly, but focusing is a much harder task when at home in our rooms with people in the house. Other than that, the course was excellent.
- The course can be a bit difficult at times but I'm not sure if this can be improved in any way.
- n/a
- none
- nothing

3.3) If necessary, clarify any of your previous responses or make additional comments:

- Good professor
- N/A (4 Counts)
- None
- Overall, great professor and interesting class! I was intimidated by econometrics when I first started but this professor made the content easy to understand and follow.
